I believe that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has dramatically improved my time at home. Before the law we received between 5-10 telecommunication calls a day. We no longer answered our phone. Since the law, we no longer get those nusiance calls and enjoy answering the phone to talk to loved ones.

The law has dropped our 5-10 calls A DAY down to 0-1 telecommunication calls per week.

Please keep this law as it currently stands. It has improved our family life dramatically.

Julie Shaw
